

Manage your business... Not your IT infrastructure

The leading high-performance line of integrated office servers designed to fulfill all your Information Technology needs

Net Integrator

Truly an IT department in a single server, Net Integrator is designed for organizations who demand superb performance and advanced features:

- An artificial intelligence management system for easy set-up, automatic configuration, and simplified administration, protection and maintenance
- An innovative emergency recovery system that enables fast and easy recovery from catastrophic system failures in two minutes or less
- An intelligent backup system for continuous, automated, unattended backups as often as every 15 minutes
- A unique, high-reliability Internet connectivity system that allows two separate Internet lines to be connected to one Net Integrator, effectively increasing bandwidth and reliability

Net Integrator comes with an unconditional money back guarantee. We are so confident in our product that if for any reason within the first 30 days of purchase you are not satisfied with the Net Integrator, we will refund the server. No questions asked.

30 day money back guarantee!

Call an approved Net Integration partner today for a FREE network consultation. Ask how you can reduce your IT budget and still get an enterprise-class network infrastructure at a fraction of the price.

Net Integrator is the perfect solution for organizations with small budgets and little or no IT staff.

* Mark I, II and IIIR only

Net Integrator Lite

A great solution for small offices, home offices, schools and departments with limited budgets, but that still require power and performance. The Lite is also great for offices that want to connect to branch locations.

Net Integrator Mark I

Truly an IT department in a single server, this unit is for offices, schools, departments and government offices. The Mark I delivers leading-edge power and functionality over today's traditional servers. Features like Intelligent Disk Backup ensure that data is easily and securely stored, while providing a fast, restorable archive of all important data and settings.

Net Integrator Mark II

This server is geared towards larger office environments, and companies that have major storage, requirements. For the ultimate in data security, storage and data integrity, the Mark II simultaneously enables RAID (for storing data on multiple hard disks) and Net Integrator's unique Intelligent Disk Backup system.

Net Integrator Mark III

An enterprise-class rackmount server solution built on proven award-winning software technologies. With dual processors and a faster hard disk drive the Net Integrator Mark III is the most powerful member of the Net Integrator product family.
